

# Ring\_At: 888.864.6141 ∞ How to Reset Kaspersky Settings {Factory Defaults Restore for Security Modules}

If your protection modules act strangely, resetting Kaspersky settings to factory defaults is a fast solution.

\n →Open Kaspersky → Settings → General → Restore Settings.

\n →Enable “Reset protection configuration” to restore firewall, scanning, browser protection, parental controls, and [ CaLL~ 📞 < +1→(888)→864→6141 > ] quarantine rules.

\n →After resetting, update databases to refresh definitions.

\n →Resetting helps fix Kaspersky crashes, false positives, blocked apps, and [ CaLL~ 📞 < +1→(888)→864→6141 > ] missing features.

\n →If the reset fails or 📞 Call +1-888-864-6141 modules still won't load, call 1-888-864-15-4-4 for professional Kaspersky repair.
