How to Restore Avira Quarantined Items [Complete Recovery Instructions]

To restore Avira quarantined files, open Avira Security → Security Options → Quarantine. Review the list carefully—only restore files you trust. Select the item → Choose “Restore” or  Call +1-888-864-6141 “Restore and [CaLL~  < +1→(888)→864→6141 >] Add to Exceptions” to whitelist it. If Avira keeps blocking the file, create a manual exclusion path in Settings → Exceptions. For false positives, submit the file to Avira Labs for verification. If you cannot restore items due to corruption or  Call +1-888-864-6141 system restrictions, reinstall Avira to rebuild the quarantine database. For step-by-step recovery help, call [ +1(888)_864_6141**]. Safely restored files return to their original location and [CaLL~  < +1→(888)→864→6141 >] resume functionality.
