Financing Options for iPhone 17 on AT&T

If you prefer to spread the cost of the iPhone 17 over several months, AT&T offers a financing option through their **AT&T Installment Plan**. This allows you to pay for the phone in monthly installments, typically over 30 months, without paying interest as long as the phone is paid off within the designated period.

For example, a 128GB iPhone 17 might cost around \$26.67 per month for 30 months, which adds up to a total of around \$799.99. The monthly payment amount will vary based on the model you choose, and there may be additional fees depending on your plan or specific promotions. Keep in mind that the installment payments are separate from your wireless service charges, so you'll need to factor in your monthly service plan as well.

Trade-In Program: Save More on Your iPhone 17 Purchase

If you have an older iPhone or another eligible device, you can trade it in to reduce the cost of the iPhone 17. AT&T's trade-in program allows you to receive credits towards your new phone purchase based on the condition and model of the device you're trading in. The credit can be applied to your AT&T bill or used towards the down payment on the new

phone.

The trade-in value for your old phone can vary widely, but for popular models like the iPhone 13 or iPhone 14, the credit could range from \$200 to \$800 depending on the phone's condition and model. Be sure to check AT&T's trade-in website for the latest offers and to see how much you could get for your old device.

Is the iPhone 17 Worth the Price at AT&T?

The iPhone 17 offers a variety of new features, including a faster processor, enhanced camera system, and longer battery life, which make it an attractive option for tech enthusiasts and everyday users alike. If you are already an AT&T customer or plan to switch to AT&T, the carrier's financing options, trade-in deals, and special promotions can make the iPhone 17 more affordable.

However, before making your decision, it's important to weigh the total cost, including the phone's price and your monthly plan, against your needs and budget.
